### Third Quarter 2010 Guidance:

The following statements are forward looking statements which are based on current expectation and which involve risks and uncertainties, some of which are set forth under "Safe Harbor Statements" below.

- Revenue is expected to range from 4% to 6% increase.
- Gross margin is expected to range from 20% to 22%.
- Operating expenses excluding foreign exchange differences are expected to range from \$80 million to \$84 million.
- 2010 annual capital expenditures expected to range from \$700 million to \$750 million.

Commenting on the quarterly results, Dr. David NK Wang, President and Chief Executive Officer of SMIC remarked, "We've witnessed overall improvement this quarter, and believe we are on course to profitability. With the world's highest GDP growth, China's market is playing a progressively greater part in the overall demand for IC's and playing an increasingly key role in SMIC's future success. Driven by China's maturing fabless companies, our China revenue has grown 27.4% quarter-over-quarter. As Chinese fabless companies continue to grow stronger and stronger, SMIC has positioned itself to become the preferred foundry. North American customers continue to contribute more than half of our revenue, and we are working to build up the relationships through improved operations, technology and service.

From a technology stand-point, our 65- nanometer process is solid and ramping up, with shipments more than doubling quarter-over-quarter and likely to double again in the coming quarter. Our 45/40-nanometer development is well underway, and the technology will be ready by the end of 2010. We remain aggressive in turning this company around, determined to sustain our competitiveness by meeting our customers' needs with excellence while balancing increasing scale with sustainable profitability."

<sup>(2)</sup> Including copper interconnects

- Revenue increased to \$381.1 million in 2Q10, up 8.4% QoQ from \$351.7 million in 1Q10 due to a 9.2% increase in wafer shipments resulting largely from a change in the business model with our managed fabs, Xinxin in Wuhan and Cension in Chengdu. Under the revised business model, customers are to sign foundry service agreements directly with SMIC, while

the orders are outsourced to Xinxin and Cension. This model results in a change in revenue booking methodology from a commission model to a buy-and-resell model. Revenue from Xinxin and Cension totalled \$17.7 million, which was 4.6% of our total revenue.

- Total operating expenses decreased to \$71.5 million in 2Q10 from \$79.5 million in 1Q10, a decrease of 10.0% QoQ driven by a decrease in G&A related expenses and an impairment loss of long-lived assets in 1Q10.
- R&D expenses decreased to \$43.3 million in 2Q10, down 0.6% QoQ from \$43.6 million in 1Q10.
- G&A expenses decreased to \$15.0 million in 2Q10 from \$17.6 million in 1Q10.
