Shanghai, China – February 6, 2006. Semiconductor Manufacturing International Corporation (NYSE: SMI; SEHK: 981) (“SMIC” or the “Company”), one of the leading semiconductor foundries in the world, today announced its consolidated results of operations for the three months ended December 31, 2005. Sales increased 7.5% in the fourth quarter of 2005 to \$333.1 million from \$310.0 million in the prior quarter. The Company reported an increase in capacity to 152,219 8-inch equivalent wafers per month and a utilization rate of 93% in the fourth quarter of 2005. Gross margins were 12.9% in the fourth quarter of 2005 compared to 8.2% in the third quarter of 2005. Net loss decreased to \$15.0 million in the fourth quarter of 2005 compared to a net loss of \$26.1 million in the third quarter of 2005. Compared to the third quarter of 2005, wafer shipments increased 5.8% to 376,227 8-inch wafers in the fourth quarter of 2005.

“We continue to receive strong orders from our broad customer base across leading edge and mainstream technology nodes,” said Dr. Richard Chang, President and Chief Executive Officer of SMIC. “As a result, our revenues and the average selling price of our wafers increased during the fourth quarter.

We continue to generate strong cash flows from operations. We generated \$174 million in cash from our operations during the fourth quarter and \$648 million in 2005. With almost \$600 million of available cash on hand and over \$600 million in available credit facilities, including the recently completed \$105 million loan facility guaranteed by Atradius Dutch State Business N.V. of Amsterdam, we will continue to expand our capacity at our existing sites. Our 2006 capital expenditure budget will be approximately \$1.1 billion, which will be scalable depending on market conditions. In addition, we will pursue alternative opportunities to expand our capacity through the use of strategic alliances.

During the fourth quarter, we commenced commercial production for nine new customers, two of whom are among the top fabless companies in the world. We also taped out nineteen new products, of which over half are products for Mainland China customers. Our Mainland China customers continue to represent an important area of growth. More than 8% of our revenues in December 2005 was generated from Mainland Chinese fabless companies. The new products we manufactured for those companies include the first 3G baseband chips on 0.13 micron process for the TD-SCDMA, WCDMA, and CDMA2000 standards, a digital satellite receiver chip for set-top boxes, and an HDTV video processor chip.

Our joint venture projects continue to progress on schedule. Specifically, our testing and assembly project in Chengdu began pilot production in December 2005 and is ramping up quickly. We anticipate that starting in the first quarter of 2006, we will offer in-house turn-key manufacturing services in China. In addition, our joint venture with Toppan to manufacture on-chip color filters and micro lenses began pilot production in December 2005 and is currently under qualification.”
