First Quarter 2017 Guidance:

The following statements are forward looking statements based on current expectations and involved risks and uncertainties, some of which are set forth under "Safe Harbor Statements" below. The Company expects:

- Revenue to decline by 2% to 4% QoQ.
- Gross margin to range from 25% to 28%.
- Non-GAAP operating expenses, excluding the effect of employee bonus accrual, government funding and gain from the disposal of living quarters, to range from \$158 million to \$164 million.
- Non-controlling interests of our majority-owned subsidiaries to range from positive \$6 million to positive \$8 million (losses to be borne by non-controlling interests).

Dr. Tzu-Yin Chiu, SMIC's Chief Executive Officer and Executive Director, commented, "We just finished another record year in 2016 with great performance and significant business accomplishments. We recorded historical high revenue of \$2.9 billion and annual revenue growth of 30.3% in 2016, outpacing the foundry industry growth rate by almost 3 times. Operating profit reached an all-time high of \$339.2 million, representing 12% operating margin. Net margin was a high of 11% and net profit attributable to SMIC reached a record high of \$376.6 million. EBITDA surpassed \$1 billion for the first time, and we achieved an improved annual ROE of 9.6% from 7.6% in the prior year. In 2016, we successfully acquired LFoundry S.r.l. ("LFoundry", the Company's majority-owned subsidiary in Avezzano, Italy), thus securing a significant foothold in the auto IC market. I am also proud of the team's quick ramp up of our Beijing JV fab and Shenzhen fab, while maintaining high overall utilization of 97.5% last year. In addition, SMIC exemplified productivity improvement with an 8.9% increase in revenue per headcount in 2016 compared to 2015.

We achieved our 8th consecutive quarter of record high revenue: \$814.8 million, representing a growth of 33.5% year over year and 5.2% quarter over quarter. Our Q4 gross margin was 30.2% and annualized ROE maintained double digit at 10.1%.

We experienced great demand from 40nm in 2016, and in 2017 we begin to transition some of our 28/40nm flexible capacity towards 28nm. Other growth drivers in 2017 include a more diverse variety of mature technologies.

We reiterate our target of 20% compounded annual growth from 2016 to 2019, and for 2017, we target revenue growth of 20% year over year, gross margin of mid to high-20's% and EBITDA margin of high-30's%.

We have an advantageous position here in China, and we continue to work hard to seize opportunities for the benefit of our stakeholders."

About Non-Generally Accepted Accounting Principles ("Non-GAAP") Financial Measures

To supplement SMIC's consolidated financial results presented in accordance with IFRS, SMIC uses in this press release non-GAAP measures of operating results that are adjusted to exclude finance cost, depreciation and amortization, income tax benefits and expenses, the effect of employee bonus accrual, government funding and gain from the disposal of living quarters. This earnings release also includes first quarter 2017 guidance for non-GAAP operating expenses. The presentation of non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with IFRS. This earnings release includes EBITDA margin and non-GAAP operating expenses which consist of total operating expenses as adjusted to exclude the effect of employee bonus accrual, government funding and gain from the disposal of living quarters. These non-GAAP financial measures are not calculated or presented in accordance with, and are not alternatives or substitutes for financial measures prepared in accordance with IFRS, and should be read only in conjunction with the Group's financial measures prepared in accordance with IFRS. The Group's non-GAAP financial measures may be different from similarly-titled non-GAAP financial measures used by other companies.

SMIC believes that use of these non-GAAP financial measures facilitates investors' and management's comparisons to SMIC's historical performance. The Group's management regularly uses these non-GAAP financial measures to understand, manage and evaluate the Group's business and make financial and operational decisions.

The accompanying table has more information and reconciliations of each non-GAAP financial measure to its most directly comparable GAAP financial measure. A reconciliation of non-GAAP guidance measures to corresponding GAAP measures is not available on a forward-looking basis because the effect of these adjustment items excluded for the purpose of non-GAAP operating expenses guidance are subject to some unpredictable conditions that cannot be estimated with reasonable certainty.

Based on total equivalent wafers out divided by estimated total quarterly capacity.

- Operating expenses were \$197.0 million in 4Q16, an increase of 59.5% QoQ from \$123.5 million in 3Q16, mainly due to the reasons stated in <u>Operating Expenses (Income) Analysis</u> below.
- Income tax benefit was \$8.5 million in 4Q16, as compared to income tax expenses of \$1.0 million in 3Q16. The change in income tax benefit (expense) was mainly due to the recognition of deferred tax benefits.
- Exchange differences on translating foreign operations were \$11.3 million loss in 4Q16, as compared to \$0.4 million gain in 3Q16, due to the translation difference at the end of the reporting period arising from certain subsidiaries using RMB as the functional currency.
- Cash flow hedges were \$34.9 million loss in 4Q16, as compared to \$0.3 million gain in 3Q16. This relates to the temporary changes in connection with the fair value of the cross currency swap contracts designated as effective cash flow hedge. - Non-controlling interests were \$46.0 million in 4Q16, as compared to \$1.4 million in 3Q16, mainly due to the recognition in 4Q16 of the contribution to SMIC group's advanced technology R&D expenses incurred in 2015 by Semiconductor Manufacturing North China (Beijing) Corporation ("SMNC", the Company's majority-owned subsidiary in Beijing).

(2) Non-GAAP operating expenses are defined as operating expenses adjusted to exclude the effect of employee bonus accrual, government funding and gain from the disposal of living quarters. SMIC reviews non-GAAP operating expenses together with operating expenses to understand, manage and evaluate its business and make financial and operational decisions. The Group also believes it is useful supplemental information for investors and analysts to assess its operating performance. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not include all items that impact our net profit for the period. In addition, because non-GAAP financial measures are not calculated in the same manner by all companies, they may not be comparable to other similarly titled measures used by other companies. In light of the foregoing limitations, you should not consider the non-GAAP operating expenses in isolation from or as an alternative to operating expenses prepared in accordance with IFRS.

The following table sets forth the reconciliation of the non-GAAP operating expenses to its most directly comparable financial measure presented in accordance with IFRS, for the periods indicated.

(3) EBITDA margin is defined as profit for the period excluding the impact of the finance cost, depreciation and amortization, and income tax benefit and expense divided by revenue. SMIC uses EBITDA margin as a measure of operating performance; for planning purposes, including the preparation of the Group's annual operating budget; to allocate resources to enhance the financial performance of the Group's business; to evaluate the effectiveness of the Group's business strategies; and in communications with SMIC's board of directors concerning the Group's financial performance. Although EBITDA is widely used by investors to measure a company's operating performance without regard to items, such as net finance cost, income tax benefit and expense and depreciation and amortization that can vary substantially from company to company depending upon their respective financing structures and accounting policies, the book values of their assets, their capital structures and the methods by which their assets were acquired. EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of the Group's results of operations as reported under IFRS. Some of these limitations are: it does not reflect the Group's capital expenditures or future requirements for capital expenditures or other contractual commitments; it does not reflect changes in, or cash requirements for, the Group's working capital needs; it does not reflect finance cost; it does not reflect cash requirements for income taxes; that, although depreciation and amortization are non-cash charges, the assets being depreciated or amortized will often have to be replaced in the future, and these measures do not reflect any cash requirements for these replacements; and that other companies in SMIC's industry may calculate these measures differently than SMIC does, limiting their usefulness as comparative measures.

The following table sets forth the reconciliation of EBITDA and EBITDA margin to their most directly comparable financial measures presented in accordance with IFRS, for the periods indicated.

(4) For the purpose of hedging against the foreign exchange risk relating to the RMB denominated liabilities including bank loans, short-term notes and medium-term notes, the Group entered into cross currency swap contracts with a term fully matching the repayment schedule of these RMB denominated liabilities. These cross-currency swap contracts were designated as hedging instrument of cash flow hedges in 4Q16. The effective portion of changes in fair value of the cross currency swap contracts is recognized in other comprehensive income, which are reclassified to profit or loss in the period when the RMB denominated liabilities affect profit or loss in response to foreign exchange fluctuation.
