Shanghai, China –February 17, 2014. Semiconductor Manufacturing International Corporation (NYSE: SMI; SEHK: 981) ("SMIC" or the "Company"), one of the leading semiconductor foundries in the world, today announced its consolidated results of operations for the three months ended December 31, 2013.

**First Quarter 2014 Guidance:**

The following statements are forward looking statements which are based on current expectations and which involve risks and uncertainties, some of which are set forth under “Safe Harbor Statements” below.

- Revenue is expected to be down 5% to down 9% quarter over quarter [\$440 million to \$460 million]. This revenue guidance is given in relation to the revenue without wafer shipments from Wuhan Xinxin in 4Q13. There will not be any wafer shipments from Wuhan Xinxin from 1Q14 onwards.
- Gross margin is expected to range from 16% to 19%.
- Non-GAAP operating expenses excluding the effect of foreign exchange, employee bonus accrual, funding of R&D contracts from the government and gain from the disposal of living quarters are expected to range from \$88 million to \$92 million.

Dr. Tzu-Yin Chiu, SMIC’s Chief Executive Officer and Executive Director, commented, “2013 was another record-breaking year for SMIC. Based on our unaudited financial statements for the full year of 2013, revenue in 2013 reached a record high, of \$2.07B, an annual growth of 21.6% when compared to 2012. If we remove the Wuhan Xinxin revenue contribution, SMIC revenue growth rate was a robust 27%. Our net profit attributable to owners of the Company also reached a historical high of \$173.2 million compared to \$22.8 million in 2012, an increase of 6.6 times. Our monthly capacity at year-end grew 6.7% year over year, to 234 thousand wafers per month compared to the end of 2012.

I’m happy to announce that our 28nm High-K Metal Gate (HKMG) and PolySiON processes are both process frozen successfully, and are in Multi Project Wafer stage. We target modest revenue from 28nm process technology at the end of 2014 and more significant ramp up in 2015.

China continues to be a leading source of high growth for SMIC. In 2013, China revenue accounted for 40.4% of our revenues, with a noteworthy growth rate of 44.9% compared to 2012.

In the long-run, we have confidence in our strategy and capability to capture growth opportunities, especially those in the China IC market. And we continue to work with our new and existing customers to capture opportunities in 2014 and onward.”

### **About Non-Generally Accepted Accounting Principles ("Non-GAAP") Financial Measures**

To supplement SMIC's consolidated financial results presented in accordance with IFRS, SMIC uses in this press release measures of operating results that are adjusted to exclude wafer shipments from Wuhan Xinxin Semiconductor Manufacturing Corporation ("Wuhan Xinxin"), which SMIC began gradually phasing out in 3Q13. This earnings release includes non-GAAP revenue, non-GAAP cost of sales and non-GAAP gross margin. It also includes first quarter 2014 guidance for non-GAAP operating expenses, which is adjusted to exclude the effect of foreign exchange, employee bonus accrual, funding of R&D contracts from the government and gain from the disposal of living quarters. The presentation of non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with IFRS.

SMIC believes that use of these non-GAAP financial measures facilitates investors' and management's comparisons to SMIC's historical performance. The Company's management

regularly uses these non-GAAP financial measures to understand, manage and evaluate the Company's business and make financial and operational decisions.

The accompanying table has more information and reconciliations of each non-GAAP financial measure to its most directly comparable GAAP financial measure. A reconciliation of non-GAAP guidance measures to corresponding GAAP measures is not available on a forward-looking basis.

- Other manufacturing costs within the cost of sales decreased to \$284.3 million in 4Q13, compared to \$294.4 million in 3Q13.
- Gross profit was \$92.9 million in 4Q13, a decrease of 17.0 % QoQ from \$112.0 million in

3Q13.

- Gross margin was 18.9% in 4Q13, down from 21.0% in 3Q13 primarily due to product mix change, lower utilization and a provision for customer claim in 4Q13.

### ***Operating Expenses (Income) Analysis***

<i>Amounts in US\$ thousands</i>	<b>4Q13</b>	<b>3Q13</b>	<b>QoQ</b>	<b>4Q12</b>	<b>YoY</b>

Other operating income	<u>(6,411)</u>	<u>(8,159)</u>	<u>-21.4%</u>	<u>(19,663)</u>	<u>-67.4%</u>

- R&D expenses increased to \$46.3 million in 4Q13, compared to \$37.6 million in 3Q13. The increase was primarily due to an increase in R&D expenses associated with higher R&D activities from quarter to quarter and a decrease in funding of R&D contracts from the government in 4Q13 of \$4.3 million compared to 3Q13.
- General and administrative expenses increased to \$36.6 million in 4Q13, up 48.1 % QoQ from \$24.7 million in 3Q13, mainly due to 1) increased bad debt expense recognized in 4Q13 and 2) a bonus accrual relating to an increase in employee productivity in 4Q13.
- Other operating income was \$6.4 million in 4Q13, compared to \$8.2 million in 3Q13. The change was mainly due to 1) a decrease of gain arising from the disposal of part of the Company-owned living quarters in Shanghai, and 2) gain arising from the deconsolidation of Brite Semiconductor Corporation and its subsidiaries due to loss of control.

*Note:*

(1) SMIC defines non-GAAP revenue, non-GAAP cost of sales and non-GAAP gross margin, which are non-GAAP financial measures, as revenue, cost of sales and gross margin, in each case excluding wafer shipments from Wuhan Xinxin. SMIC reviews non-GAAP financial measures together with revenue, cost of sales and gross margin to understand, manage and evaluate its business and make financial and operational decisions. The Company also believes it is useful supplemental information for investors and analysts to assess its operating performance without the effect of wafer shipments from Wuhan Xinxin, which were not output through its production capacity. SMIC announced in March 2013 that it had ceased to manage and operate the 300mm wafer fab in Wuhan owned by Wuhan Xinxin, and began gradually phasing out wafer shipments from Wuhan Xinxin in 3Q13. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not include all items that impact our net profit for the period. In addition, because non-GAAP financial measures are not calculated in the same manner by all companies, they may not be comparable to other similar titled measures used by other companies. In light of the foregoing limitations, you should not consider non-GAAP financial measure in isolation from or as an alternative to revenue, cost of sales and gross margin prepared in accordance with IFRS.

The following table sets forth the reconciliation of each of non-GAAP revenue, non-GAAP cost of sales and non-GAAP gross margin to its most directly comparable financial measure presented in accordance with IFRS, for the periods indicated.
